-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 4/15/2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Newly submitted claims 23-32 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: said claims are directed to the non-elected species of A2-A7.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 23-32 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

It is unclear to the examiner how claims 23-32, which are substantially the same as non-elected claims 4-16 (as affirmed by applicant's election in paper number 6) can now be generic and/or readable on species A1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Thomas (US Pat. 5,860,318).

Thomas (US Pat. 5,860,318) discloses a slide drive having a slide 12, 16, comprising:
means for adjusting said slide drive device 14;

Art Unit: 3682

said adjusting means being effective to adjust a stroke of said slide 12, 16;

said adjusting means 14 being pivotable about a center position to adjust said stroke;

said center position being one of a top and a bottom dead center position of said slide;

said adjusting means 14 receiving a reciprocating motion;

means for guiding said slide drive device (telescoping guide between 16 and lower half);

a connecting link 28;

said connecting link being effective to transfer said reciprocating motion to said guiding means;

said guiding means being effective to convert said reciprocating motion to a guiding displacement;

at least one drive branching link in said guiding means 34;

at least one of a first and a second upper toggle means 30;

said at least one upper toggle means 30 for driving said slide in a cycle;

said at least one drive branching link 34 transferring said guiding displacement to said one upper toggle means; and

said one upper toggle means 30 being effective to transfer said guiding displacement to said slide and drive said slide through said cycle;

a connecting rod 22;

said connecting rod 22 slidably guided by said adjusting means;

a crankshaft 18;

an eccentric part on said crank shaft 20;

said connecting rod 22 operably connects said eccentric part to said adjusting means; and

Art Unit: 3682

said connecting rod 22 operably connects said eccentric part to said adjusting means; and
said connecting rod 22 being effective to transfer said reciprocating motion to said
adjusting means whereby said slide operates thru said cycle;
said adjustment means is operably affixed to said connecting rod 32;
said adjusting means is operable to guide said connecting rod along a specified trajectory
34; and
said adjusting means is pivotable about said center position to adjust said specified
trajectory whereby said stroke is adjusted.

FACSIMILE TRANSMISSION

Submission of your response by facsimile transmission is encouraged. Group 3600's facsimile number is (703) 305-3597. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see MEP. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check.

Art Unit: 3682

Responses submitted by facsimile transmission should include a Certificate of Transmission (MEP. 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to the Patent and Trademark Office (Fax No. (703) 305-3597) on _____

(Date)

Typed or printed name of person signing this certificate:

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and MEP. 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.
